Handmade Combs

### **Handmade Combs-for Men and Women**

Kent hand sawn combs are cut from large sheets of cellulose acetate rather than moulded, producing a truly gentle comb, which is the secret of their success. This material is tactile, flexible and strong. They glide effortlessly through hair without scratching or damaging the hair or scalp. Kent combs have rounded teeth which ensure a smooth and comfortable action. The range includes designs for thick and fine hair, in varying sizes, for both men and women.
