

 **KENT.**  
Kent For Men

### **Kent For Men**

An exciting range of brushes designed specifically for men, combining black handles, and grey, non-scratch quills that contain powerful energising ion molecules that help remove UV environmental damage from the hair.

### **Understanding Ion:**

An ion is an atom that has lost or gained one electron making it negatively or positively charged. Volcanic Andosite quartz crystals, emit negative ions and when added to resin can be formed into brushes. This produces brush quills that have a safe natural energy when used in brushing.

The capillary vessels become stimulated and the cuticle layer is tightened which seals in natural oils and leaves hair soft and vitalised.

Kent For Men

KFM1

Wet styler-half radial,  
sponge base for water absorption

KFM2

Gel styler- half radial, for thick/long hair,  
for use with hair products

KFM3

Gel styler- flat narrow design, for short hair,  
for use with hair products

KFM4

Folding styler- all hair types, travel size
