## Shaving

### **Shaving brushes and Shaving products**

A striking range of pure badger hair shaving brushes in traditional and contemporary designs. Badger hair is regarded as the most resilient yet softest material to use for traditional 'wet' shaving. Use the brush with a back and forth motion on the soap and work into a thick lather on the beard.

The action of the brush on the beard lifts the hair allowing the razor to give the closest shave possible. For those who require a choice other than natural bristle Kent offers a synthetic brush that provides an excellent substitute. To complement our shaving brushes we have a selection of wooden bowls and porcelain shaving mugs, soaps, and distinctive razors and travel sets. Please visit our website for details on 'wet' shaving.
