

Toothbrushes

Kent Toothbrushes

Collaboration with dentists and oral hygiene consultants has resulted in this range of specialist and family toothbrushes.

'Refresh' family toothbrushes are packed in an innovative duo pack that opens to become a free-standing holder for the toothbrush. They are available in five colours and in soft, medium and hard nylon textures. Specific concerns of oral hygiene are addressed within our specialist range; extra hard bristle brushes for smokers and super soft badger hair for sensitive gums. For travel there is a convenient set comprising toothbrush and toothpaste. Finally, the ultimate in quality is our traditional handmade pure bristle toothbrush, the 'Classic', available in both medium and hard textures.
